12:50-13:00	Questions and Answers	
13:00-13:10	Concluding remarks	

Project: Building an Excellency Network for Heightening Agricultural economic research and Education in Romania – ENHANCE
This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 691681

The ENHANCE project members, together with the Advisory Board representatives, USAMV staff, USAMV students and some representative figures for the agriculture sector in Romania joined for the last project's conference organized by the Faculty of Management, Economic Engineering and Rural Development on 14th of December 2018.

The event was a success, with many relevant and emotional discussions for all the staff members and beneficiaries of the staff exchanges and training sessions.

It was stated the importance of this project and the future need for similar projects to provide a fertile ground for more bi- and multilateral joint research and teaching activities in the years to come..

The ENHANCE project represents a big step in developing the currently existing scientific potential of the agricultural economists of the USAMV.
