ENHANCE Project at Salonul Cercetării Românești “Conceput în România”/ Romanian Research Salon “Made in Romania”, Bucharest, 2017

The ENHANCE project team was present on **26 and 27 October 2017** at Palace of Parliament where the Ministry of Research and Innovation (MCI) through UEFISCDI, in partnership with the Chamber of Deputies, organized **Salonul Cercetării Românești “Conceput în România”** (Romanian Research Salon “Made in Romania”), 2017.

This event aimed to promote the results of scientific research in Romania as well as the latest and most ingenious technologies and products made on the basis of patents for invention.

During the two days, the exhibitors, research organizations from Romania, had the opportunity to have a dialogue with the visitors, to present the latest achievements in the form of products, prototypes, functional models along with the major projects they implement.

Additionally, young enthusiasts of innovation and development of new technologies were present at the event, in their dedicated section.

UEFISCDI presented the agency's work, coordinated funding programs, support platforms for RDI and the future events.

For this participation the ENHANCE project was awarded a Diploma of Excellence.
